

San Diego Community College District

CLASSIFICATION DESCRIPTION

Title: Business Systems Analyst
Unit: Supervisory and Professional

Page: 1 of 2
Job Code: D1768
Original Date: 06/2017
Last Revision: 07/2024
Staff Type: Classified
FLSA status: Exempt
Salary Level: 05

DEFINITION

Under the general direction of the appropriate Vice Chancellor or assigned manager and reporting under Student Services; People, Culture & Technology Services; Finance and Business Services; or Office of Institutional Innovation and Effectiveness, coordinate and perform one or more of the following functions related to business and system analysis, project management, assessment, business plan development, application planning, design, troubleshooting, or ongoing maintenance of one or more major modules of the District's enterprise system or emerging technologies and processes. Collaborate closely with administrators, managers, researchers and Information Technology teams to ensure alignment with institutional goals and practices. Provide supervision and work direction to assigned personnel.

EXAMPLE OF DUTIES

1. Perform complex cross-departmental functional analysis, including mapping, setup, system modeling, testing, and troubleshooting of assigned information systems and emerging technologies to recommend implementation practices. Perform complex functional analysis of third-party computer applications, reporting functions, assessment, scanning, and other testing.
2. Consult cross-divisionally to maximize functionality and the efficient use of assigned information systems and emerging technologies. Develop business process modifications and determine strategic solutions to provide consistency; analyze operational and business mandates and legal requirements; identify and analyze complex business process issues and dependencies; propose policy, standards, project direction, and strategies to meet information needs; coordinate with Information Technology staff in the development of priorities.
3. Analyze, evaluate, and test new technology, system upgrades, new releases, bundles, and patches; review vendor documentation to identify processes and assess integration issues; verify compliance of new systems processes; work with users and application developers to conduct performance and compliance testing and identify fixes or corrections.
4. Provide technical support and expertise for assigned applications; or technology, troubleshoot and resolve application or database problems; review and analyze system problems, including system documentation and production output, to identify solutions; recommend changes as needed; confer with vendor and Information Technology staff to solve complex procedural, operational, and technical problems.
5. Develop documentation and provide training to other district staff responsible for end user training; develop procedures and user manuals to maintain consistency of computer use throughout the District.
6. Analyze requests for application and technology enhancements; provide guidance to end users on application use and operating parameters; translate user expectations into technical specifications for enhancement and customization projects.
7. Provide technical assistance to end users in updating and maintaining system data; write, modify, and generate ad hoc queries and reports; serve as liaison with application developers and researchers, vendor representatives, and Information Technology staff for system or production problems; prepare various reports and summaries for management and/or users.
8. Set up and maintain security profiles for system users.

9. Train, develop, supervise and evaluate assigned personnel; recommend disciplinary action as necessary; provide for technical direction and guidance; make employment, termination, transfer or promotional recommendations.
10. Perform related duties as assigned.

DESIRABLE QUALIFICATIONS

Knowledge:
